### Profile

Full Stack Developer skilled in React, Angular, Next.js, Node.js, and MySQL. Experienced in building responsive UIs and secure back-end systems with RESTful APIs. Strong foundation in software engineering from 1337 Benguerir. Passionate about clean code, teamwork, and continuous learning.

### Education

#### Member, software architect, 1337 Benguerir

11/2021 – 12/2025

The 42 Common Core sharpened my expertise in low-level programming, system design, and network engineering through intensive, project-based learning. I mastered C, C++, memory management, and socket programming, while developing autonomy, problem-solving skills, and a client-first mindset essential for real-world software development.

### Professional Experience

#### Lead Developer, OS Websolutions

06/2024 – present

- Developed and maintained a scalable AI-powered lead generation platform using **Next.js 14**, **React 19**, **TypeScript**, and **Tailwind CSS**
- Designed end-to-end UI/UX workflows and implemented component-based architecture to ensure maintainability
- Integrated REST APIs and managed complex state with **Redux** and **Zustand**
- Mentored junior developers and led code reviews in an Agile team environment
- Contributed to backend services using **Node.js** and **Express.js**

#### Full Stack Developer, UM6P College of Computing

11/2023 – 04/2024

- Built responsive web interfaces using **Angular** and **TypeScript**, focusing on high usability and performance.
- I collaborated with the backend team to integrate REST APIs into frontend applications. Additionally, I implemented and deployed a real-time transcription microservice, ensuring a seamless flow of data and the responsiveness of the user interface
